The University

Multan has always remained a centre of excellence in education. Hazrat Bahauddin Zakariya (1172 - 1262 A.D.), a Muslim religious scholar and saint, established a school of higher learning in theology in Multan; where scholars from all over the world came for studies and research. Multan has maintained its central position and centuries old cultural heritage and therefore suited ideally to become a center of learning. Thus the University of Multan was established in 1975 by an Act of the Punjab Legislative Assembly. To pay homage to the Great Saint, the name was changed from University of Multan to Bahauddin Zakariya University in 1979.

The University is located at a distance of 10 km from the city center. The main Campus is spread over 960 acres of land. The University has a fleet of 28 buses and 3 coaches which provides transport facilities to students and staff. The University started functioning in 1975 in rented buildings with 8 departments. Presently, it has more than 30 departments/institutes/colleges. Out of its 392 faculty members, 130 hold doctoral degrees and among its around 10,000 students, half are female.

The University offers a wide range of programs: M.A., M.Sc., MBA, M.Com., MCS, M.Phil, and Ph.D. Additionally, in recent years, the University has taken a lead in introducing 4-Year Undergraduate programs in Science, Commerce, Business, Pharmacy, Engineering, and English Literature and Linguistics. Various short-time courses and diplomas have become popular with the general public and are offered from time to time.

The University is widely known as an institution of strong performance and high ambition because it has continued to make excellent progress toward its goals. It plays a significant role in developing indigenous human resources through its highly productive achievements, both in sciences and humanities.

The University through different phases has made tremendous progress, but some recent developments are remarkable. To promote the activities of art and culture, Multan College of Arts was established in 2003. In order to cater to the needs of textile industry, which is a major industry of the area, the University College of Textile Engineering was established in 2004. The University has also established two sub-campuses at Sahiwal and D.G. Khan to provide education facility at the doorsteps of

the people as part of the policy of the Government. Steps have been taken to establish the University's linkages with the community and Industry. There has been significant enhancement in students' enrollment. To ensure quality in academics and research, Quality Enhancement Cell has been established. A large number of buildings are under construction. These buildings will provide better facilities to the students. The University has implemented semester system in almost all the departments and organizing international conferences and seminars has been a routine academic activity. A significant number of faculty members have been awarded post-doc research fellowships. The establishment of the Saraiki Area Study Centre, Institute of Biotechnology and Faculty of Veterinary Sciences are some recent developments.

The Bahauddin Zakariya University is the fastest growing public university in Pakistan, and it will continue to play a vital role in the development of the country.

Background

In 1975, the Government of the Punjab decided to set up four Engineering Colleges at Taxila, Multan, Faisalabad and Bahawalpur in the same order of priority. In accordance with the decision of the Punjab Cabinet, the first Engineering College initially started functioning at Sahiwal and was later, in 1978, shifted to Taxila as a second campus of the University of Engineering and Technology, Lahore. Later its status was raised to an independent University of Engineering and Technology. The proposal for the second College of Engineering and Technology at Multan met the approval of the ECNEC in September 1990.

The College of Engineering and Technology was thus established as a Constituent College of the Bahauddin Zakariya University, Multan. Its broad objective is to produce engineers at undergraduate level with bachelor's degree in conventional fields of Civil, Building & Architectural, Electrical, Computer and Mechanical Engineering to meet the engineering and technological manpower requirements of the province/country.

The College offers courses leading to the award of 4-Year engineering degree in Civil, Electrical, Building & Architectural, Computer and Mechanical Engineering. The College envisages to provide for teaching facilities to more than 1000 students at an annual intake of more than 250 students (in all disciplines of Engineering) after the completion of the project. Due to certain spatial, financial and administrative constraints, the College started Civil Engineering Program in 1994. In 1997, Electrical Engineering Program was started. In 2004 three new disciplines namely Building & Architectural Engineering, Computer Engineering and Mechanical Engineering were started.

Seventy acres of land at the campus of the University has been allocated for the construction of various academic and administrative blocks of the College. The plans of the administrative and academic blocks, with adequate space for class rooms and laboratories have been prepared. Purchase of equipment for laboratories and books for library has already been taken in hand. The construction work of the Civil Engineering Department was completed in January, 1998. The construction work of Electrical Engineering Department was completed in January, 2000 and that of Mechanical Engineering Department was completed in May 2007. Moreover, the extension of Civil and Electrical Engineering departments are also completed. The construction of a boys hostel to accommodate 600 students, seven residences for teaching staff and twelve residences of other staff have also been completed.

The University College of Engineering & Technology excels in innovative teaching and research, in developing practical applications and approaches to problems and areas of study, and in preparing professionals and leaders who will have worldwide influence on technologies and societies.
