Dr. Muhammad Sakir

### Introduction

Livestock is an important sector of Agriculture in Pakistan. Livestock present in this region plays a vital role in the economy of the country. The Economic Survey of Pakistan shows that Livestock plays an important role in the agriculture sector of Pakistan, as it accounts for 51.8% of share in agriculture and contributes about 11.3% of GDP in the country. About 30-35 million rural population is engaged in livestock sector which provides the main asset base to stabilize the income of the poor families in Pakistan.

The crucial importance of Veterinary Sciences and food security in the national economy demands an immediate attention not only to upgrade veterinary education/training programs, but also needs improvement in quality education being provided by private and public sector educational institutes.

Foreseeing the very much crucial role of livestock in the rural economy, Vice Chancellor in the pursuance of the directive of the Chief Minister Punjab announced the establishment of the Veterinary College at Bahadur Sub-Campus in 2011.

### Mission

The mission of Veterinary College is to benefit the people of the area and the whole society through the provision of quality education and quality veterinarians and alongwith the efficient ways of production of animals.

### Goals

- To provide a comprehensive professional curriculum that will educate students in the field of veterinary medicine.

- To promote growth and excellence in research in the areas related to veterinary sciences.

### Potential Fields for DVM Degree

The potential fields for the degree of Doctor of Veterinary Medicine (DVM) are as follow:
